## SCHEDULE 1 — SAINTE-LAGUË SEAT ALLOCATION METHOD (Section 220)

### 1 Purpose of this Schedule

The purpose of this Schedule is to set out the mathematical method used to allocate seats in Parliament to political parties in proportion to their share of the party vote.

### 2 Definitions

In this Schedule—

“**party vote**” means the total number of valid party votes cast for a political party at a general election.

“**eligible party**” means a political party that meets the threshold in section 219.

“**divisor**” means a number used to divide a party’s vote total to generate quotients for ranking.

### 3 Divisors

(1) The Sainte-Laguë method uses the following sequence of divisors:

1, 3, 5, 7, 9, 11, 13

(2) Additional divisors must be used as necessary to allocate all seats.

### 4 Calculation of quotients

(1) For each eligible party, a series of quotients must be calculated by dividing the party’s total party votes by each divisor.

(2) The formula is—

$$Q_n = V/D_n$$

Where—

$Q_n$  is the nth quotient;

$V$  is the party’s total party votes;

$D_n$  is the nth divisor

### 5 Ranking of quotients

(1) All quotients calculated under clause 4 must be arranged in descending numerical order.

(2) The highest 26 quotients correspond to the 26 seats in Parliament (subject to overhang under Part 11).

(3) Each quotient is assigned to the party from which it was derived.

**6 Allocation of seats**

- (1) Each time a party's quotient appears in the ranked list, that party is allocated one seat.
- (2) The total number of seats allocated to a party under this Schedule is that party's proportional entitlement under section 198.

**7 Deduction of electorate seats**

- (1) The number of electorate seats won by a party must be deducted from its proportional entitlement.
- (2) If the number of electorate seats exceeds the entitlement, the party retains all electorate seats and creates overhang seats.

**8 Worked example (illustrative only)**

- (1) Suppose the following party votes are cast:
  - Party A: 120,000
  - Party B: 80,000
  - Party C: 40,000
  - Party D: 10,000 (below threshold; excluded)
- (2) Quotients are calculated using divisors 1, 3, 5, 7, etc.
- (3) The highest 26 quotients are selected.
- (4) Seats are allocated accordingly.
- (5) This example is for illustration only and does not form part of the law.

**SCHEDULE 2 — OATH OR AFFIRMATION OF MEMBERS OF PARLIAMENT  
(Section 217)**

**1      Oath of Allegiance**

A Member of Parliament taking the oath must say:

“I, [name], swear that I will be faithful and bear true allegiance to Square Country and to the Constitution of Square Country, and that I will faithfully perform the duties of a Member of Parliament. So help me God.”

**2      Affirmation of Allegiance**

A Member of Parliament making an affirmation must say:

“I, [name], solemnly, sincerely, and truly declare and affirm that I will be faithful and bear true allegiance to Square Country and to the Constitution of Square Country, and that I will faithfully perform the duties of a Member of Parliament.”

**3      Manner of taking oath or affirmation**

- (1) The oath or affirmation must be taken before—
  - (a) the Governor-General; or
  - (b) a person authorised by the Governor-General
- (2) The oath or affirmation must be taken before the Member may sit or vote in Parliament.

**4      Record of oath or affirmation**

- (1) The Clerk of the House must record the taking of the oath or affirmation.
- (2) The record must be kept in the parliamentary archives.
